Sonderup Charolais Ranch

We would like to thank you for taking the time to look through our top-end bulls of 2022. Our feed ration was calculated for a base gain of 3.15 lbs/day. As we have done in the past, all bulls will be halter broke and guaranteed breeders.

As in years past, we continue to have strong interest in our cattle. With the tight margins in agriculture, a bull that can produce calves that gain efficiently becomes even more important. We know that our bulls do this, and that is why almost 85% of our bulls are sold to repeat customers. Our bulls continue to produce heavier weaning weights and they gain better than the competition.

Calves out of our bulls gain in the feedlot as well. We had one custom lot manager in Central Nebraska tell us how excellent the calves out of our bulls fed out. He stated that the calves sired by our bulls gained 3.5/lbs/day with a feed conversion of 6:1. This bested his lot's 10-year average of 7.2:1 on all breeds. These comments continue to reinforce our feed efficiency results we see in the analysis of our own data.

We strongly encourage you to come and evaluate our animals. We have been breeding Charolais cattle for over 54 years and we will do our best to find a bull that will fit in your herd! We will be offering free delivery and boarding will be free until April 1st.

Mark & Ryan Sonderup

Guarantee:

All bulls will sell with a first breeding season guarantee, which includes the first 60 days after turn out. Reproductive injuries need to be examined by a veterinarian. If a satisfactory bull is available for replacement, we will replace the bull; if there is no replacement available, you will be awarded sole credit for a future purchase. In order for a replacement to be made, the bull needs to be fed and cared for adequately and not neglected.
